

Amendments to the Claims:

1        1 (Previously Presented). A method for defining and later retrieving user-specified information by means of a mobile telephone, comprising the following  
2        steps:

- 3            a) using a user data processing system to prepare at least one query  
4            profile where each query profile has at least one information  
5            requirement and an associated brief command and where each brief  
6            command can be specified using the keypad of a mobile telephone;
- 7            b) sending the query profile using the user data-processing system to  
8            an information supplier;
- 9            c) sending an information call using a mobile telephone to the  
10            information supplier containing at least one of the brief commands;
- 11            d) comparing the brief command sent in accordance with step c) with  
12            the brief commands of the query profiles prepared and sent in  
13            accordance with steps a and b);
- 14            e) putting together the information of the information requirements  
15            contained in the associated query profile in the event of agreement  
16            in accordance with step d);
- 17            f) sending the collected information to the mobile telephone; and
- 18            g) presenting the information to a user of the mobile telephone by way  
19            of the mobile telephone.

21

22        2 (Previously Presented) The method in accordance with Claim 1  
23        characterized in that step b) takes place via a data link between the user data-  
24        processing system and an information supplier data-processing system.

25

26        3 (Original). The method in accordance with Claim 1 characterized in that  
27        the query profile is produced by a speech computer.

28

1        4 (Previously Presented). The method in accordance with Claim 1  
2 characterized in that the information call is sent with a PIN, where the PIN  
3 establishes entitlement to call up the specified information.

4

5        5 (Previously Presented). The method in accordance with Claim 1  
6 characterized in that the information call is sent with a telephone number of the  
7 caller, where the telephone number establishes entitlement to call for the  
8 information.

9

10        6 (Previously Presented). The method in accordance with Claim 2  
11 characterized in that the data link is effected through a modem to the information  
12 supplier data-processing system.

13

14        7 (Previously Presented). The method in accordance with Claim 2  
15 characterized in that the data link is effected through the Internet to the information  
16 supplier data processing system.

17

18        8 (Previously Presented). The method in accordance with Claim 1,  
19 comprising the further step:

20            downloading JAVA applets, stored on a server of the information supplier  
21 through the Internet to the user data processing system; and

22            preparing the query profile in accordance with step a) by means of the  
23 JAVA applets.

24

25        9 (Previously Presented). The method in accordance with Claim 1  
26 characterized in that step c) is effected through a SMS of the mobile telephone.

27

28        10 (Previously Presented). The method in accordance with Claim 1  
29 characterized in that steps d) through f) are each effected through one of the  
30 information supplier's programs.

1 11 (Canceled).

2

3 12 (Previously Presented). The method in accordance with Claim 1  
4 characterized in that sending, in accordance with step f), is effected via another  
5 mobile telephone.

6

7 13 (Previously Presented). The method in accordance with Claim 1  
8 characterized in that sending in accordance with step f) is effected first via a data  
9 link to a mobile radio network operator and then via a telephone network to the  
10 mobile telephone.

11

12 14 (Previously Presented). The method in accordance with Claim 1  
13 characterized in that the information, in accordance with step g), is presented  
14 visually or acoustically.

15

16 15 (Canceled).

17

18 16 (Canceled).

19

20 17 (Canceled).

21

22 18 (Canceled)

23

24 19 (Canceled).

25

26 20 (Canceled)

27

28 21 (Canceled)

29

30 22 (Canceled)

4

1           23 (Previously Presented) A method for calling up information via a mobile  
2 telephone where a query profile is prepared using a user data-processing system  
3 and deposited with an information provider, where the query profile specifies at  
4 least one information requirement and with which query profile a brief command  
5 is associated for its identification, comprising the following steps:

6           a)    sending a call for information by means of the mobile telephone to  
7 the information provider containing at least the brief command;

8           b)    comparing the sent brief command with the brief command of the  
9 query profile;

10          c)    putting together the desired information of the at least one  
11 information requirement of the query profile in the event of agreement in  
12 accordance with step b);

13          d)    sending the collected information to the mobile telephone; and

14          e)    presenting the information to a user of the mobile telephone via the  
15 mobile telephone.

16

17          24 (Original).       The method in accordance with Claim 23 characterized  
18 in that step a) is effected via SMS of the mobile telephone.

19

20          25 (Original).       The method in accordance with Claim 23 characterized  
21 in that steps b) through d) are effected through a program of the information  
22 provider.

23

24          26 (Canceled).

25

26          27 (Previously Presented).   The method in accordance with Claim 23  
27 characterized in that the transmission in accordance with step d) is effected via  
28 another mobile telephone.

29

30          28. (Previously Presented).   The method in accordance with Claim 23

1     characterized in that the transmission in accordance with step d) is effected first  
2     via a data link to a mobile radio network operator and then via a telephone network  
3     to the mobile telephone.

4

5           29 (Previously Presented). The method in accordance with Claim 23  
6     characterized in that the information in accordance with step e) is presented either  
7     visually or acoustically.
